Approved for use through 01/31/2004. OMB D051-0033

U.S. Patent and Trademark Office: U.S. DEPARTMENT OF COMMERCE

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)

31824-RE2

As a below named inventor, I hereby declare that

My residence, mailing address and citizenship are stated below next to my name.

I believe I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of the subject matter which is described and claimed

In patent number 5,902,982, granted May 11, 1999, and for which a reissue patent is sought on the invention CHANGEABLE MACHINE READABLE ASSAYING INDICIA

the specification of which

☐ is attached hereto.☒ Was filed on May 10, 2001 as reissue application number 09/852,872
and was amended May 1, 2002
(If applicable)

I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.☐ by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

The claims as patented are not directed to an assay arrangement designed for drug screening of an individual comprising assaying indicia which are machine readable only and not human interpretable in the absence of machine reading so that others viewing the indicia after contact with a urine sample are unable to directly interpret the results of the individual's drug screening assay without the machine reading.
